ANTI-FLOOD AIR BRICK

PRODUCT DATA  
SHEET

**LAKESIDE**  
FLOOD SOLUTIONS

## Anti-flood Air Brick

Automatic, passive defence solution.  
Permanently fitted.  
No external power supply required.

### Specification:

- Automatic/ Multi-Use Device
- Permanently fitted
- Prevents water passing through the airbrick
- Floatation valve to block passage of water before entry
- No mesh to restrict airflow which could cause damp
- Straight replacement for a standard clay airbrick
- Only simple regular maintenance required - modular design so can be disassembled to clean post flood
- Extremely effective and simple
- Can be used over and over again
- Works independently from all household services.

## PRODUCT DATA SHEET

### Key features:

- Acts as a standard air brick allowing unrestricted airflow underneath the property, yet under flood conditions uses the rising water to automatically shut off, inhibiting access through the airbricks and therefore flooding underneath the property.
- Unlike sandbags and air brick covers, no flood warning or pre flood intervention is required.
- Requires no external power supply to operate
- Can be easily maintained and cleaned post flooding
